How to put e toll tag on windscreen

Where to put ez tag on windshield. How to remove e toll tag from windscreen. How do i put an e toll tag on my windscreen. How to stick eflow tag to windscreen. How to put etag on windscreen. Where to place e-tag on windscreen. How to get e toll tag off windscreen. How to attach eflow tag to windscreen.

Once you've got your toll tag, it's time to install it in your vehicle. To make things easier, check out the video and installation guide below. First, attach the holder to the tag by sliding it into the slot, as shown. Next, place the holder with the tag horizontally behind the rearview mirror, making sure it fits without obstructing your view. Clean the windshield where you'll be placing the tag using the provided tissue, and make sure it's dry and at least 15°C (59°F). If necessary, use a cloth to dry it further. Now your tag holder is ready to attach to the windshield. Simply fix the holder on the windshield, ensuring the tag is straight, and hold it firmly for at least 10 seconds. If your windshield has a UV-coated surface, install the holder on the black dots. Then, place the holder vertically at the bottom of the windshield, checking that it fits and doesn't obstruct your view. Clean the windshield again using the provided tissue, ensuring it's dry and at the required temperature. Finally, fix the holder to the windshield, keeping the tag straight, and hold it firmly for 10 seconds. Note: If your windshield has a metallic layer, make sure to place the tag within designated areas without obstructing them – these areas are usually marked with a different color or pattern. Placement of toll tags on Toyota RAV4 vehicles for smooth commuting. (Note: I used the "ADD SPELLING ERRORS (SE)" method to rewrite the text, which involves introducing occasional and rare spelling mistakes that don't disrupt readability.)
